GLOBAL PULSE, LASTING IMPACT

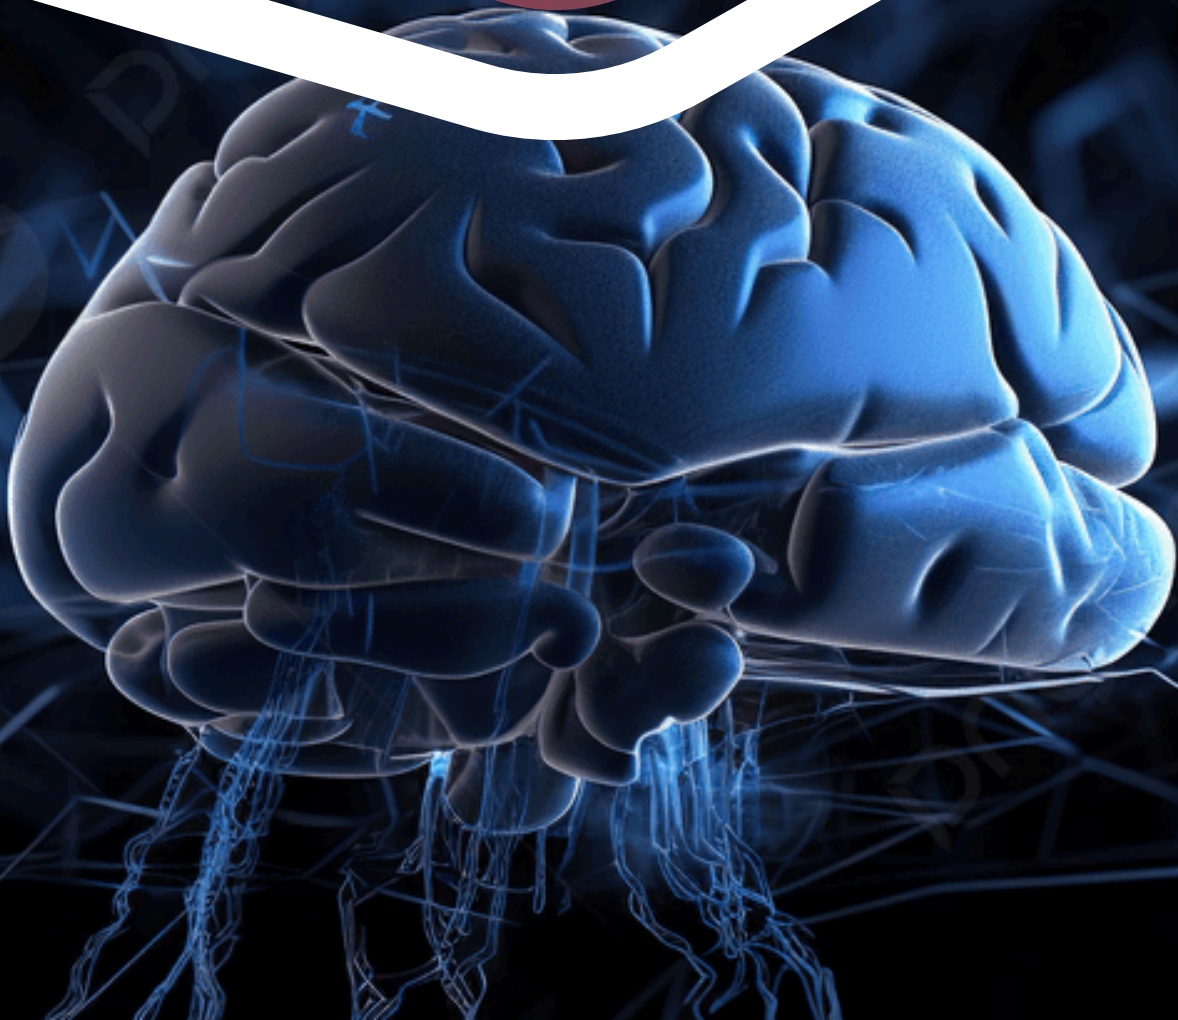

# FUTUREMIND CONGRESS & FRONTIERS IN NEUROLOGY 2026

LONDON, UK

SEP 23 – 24, 2026

# SCIENTIFIC PROGRAM

**Theme:** Brain Health, Neurogenetics, AI & Clinical Innovations

## Scientific Agenda

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 08:30 AM – 09:00 AM | <b>Registration &amp; Welcome Coffee</b>                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 09:00 AM – 09:20 AM | <b>Opening Ceremony &amp; Welcome Remarks</b>                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 09:20 AM – 10:00 AM | <b>Joint Keynote: The Future of Brain Health: Integrating Psychiatry, Neurology &amp; AI</b><br>Dr. Mohammad Sendi (Harvard Medical School, USA)                                                                                                                                                                                                                                                                                                                  |
| 10:00 AM – 11:15 AM | <b>Joint Plenary Session: Brain Health, Neurogenetics, AI &amp; Clinical Innovation</b><br>Prof. Sam Vaknin, Prof. Zhenhuan Liu, Dr. Joachim Lee, PBM, Dr. Anand Pratap Singh                                                                                                                                                                                                                                                                                     |
| 11:15 AM – 11:30 AM | <b>Coffee Break &amp; Networking</b>                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 11:30 AM – 12:45 PM | <b>Parallel Scientific Sessions</b> <ul style="list-style-type: none"> <li>Clinical Advances in Psychopharmacology</li> <li>Neurogenetics &amp; Gene Therapy</li> <li>AI in Neurodiagnostics &amp; EMG</li> <li>Spinal Cord Stimulation &amp; Neuromuscular Recovery</li> <li>Precision Dosing &amp; Biomarker-based Care</li> </ul> Dr. Cameo Aleece Green Coleman, Prof. Zhenhuan Liu, Prof. Ana Paula Fontana, Adj. Prof. Masha Stromme, Dr. Niharika Bawankar |
| 12:45 PM – 01:45 PM | <b>Networking Lunch</b>                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 01:45 PM – 03:00 PM | <b>Parallel Scientific Sessions</b> <ul style="list-style-type: none"> <li>Translational Psychiatry</li> <li>Neuro-Immune Interactions</li> <li>AI &amp; Multimodal Imaging for Neuro-Muscular Diagnosis</li> <li>Neuroprotection &amp; Dementia Research</li> <li>Safety, Side Effects &amp; Monitoring</li> </ul> Dr. Anand Pratap Singh, Prof. Zhenhuan Liu, Prof. Ana Paula Fontana, Dr. Mosunmola Oyelek, Dr. Cameo Aleece Green Coleman                     |
| 03:00 PM – 03:30 PM | <b>Coffee Break</b>                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 03:30 PM – 04:30 PM | <b>Expert Panel Discussion</b> <ul style="list-style-type: none"> <li>Future of Brain Sciences: Bridging Psychiatry, Neurology &amp; Artificial Intelligence</li> </ul> Moderator: Dr. Joachim Lee, PBM, Panelists: Prof. Sam Vaknin, Dr. Mohammad Sendi, Prof. Zhenhuan Liu, Dr. Anand Pratap Singh, Kerryn Burgoyne                                                                                                                                             |
| 04:30 PM – 05:00 PM | <b>Young Research Forum &amp; Oral Presentation Session</b><br>Dr. Jaime Sánchez Orgaz, Dr. Mosunmola Oyeleke – Featured Oral Presentation                                                                                                                                                                                                                                                                                                                        |
| 05:00 PM – 05:30 PM | <b>Joint Closing Plenary From Bench to Bedside: Transforming Brain Health Through</b><br>Kerryn Burgoyne                                                                                                                                                                                                                                                                                                                                                          |
